**The Hiring Manager**

United States  
Respected Manager,

Application for 2024 Intern: Software Engineer

I have 2 years of experience as a **Senior Software Engineer-Java Full Stack Developer at LTIMindtree**. I am a **Oracle Certified Java SE 11 Professional** and I have build web enterprise applications using AngularJS(TypeScript) for front end, Java Spring Framework for back end (using REST APIs, MVC Design Patterns) and Oracle SQL developer as database and have experience in using Postman API and got certified for the same. I also build NodeJS based web applications for personal projects and I am well equipped in learning technologies faster. I have been awarded the **highest performance award** for the year 2022-2023 by LTIMindtree. I have learned several technologies in the span of **two years of my work experience** and I want to leverage those skills to the fullest in your company. I used to work in the Banking and Financial Services domain for the **past two years with CitiCorp** and I think this experience will help me to understand the business logic during internship more easily. I love to play table tennis and go to the gym consistently. I feel consistency is all it takes to become better and I gotta take it from my weightloss journey. I think holding two years of experience in software development will make me a suitable fit for internship roles in your company. I truly hope to work with you and your team to give my best. Awaiting your positive reply.

Yours sincerely,

**Ratish Kumar Saravanan**
